Volume 77 (1991)

PHYSIOLOGY AND BIOCHEMISTRY

Regulation mechanisms of phenolic production in the lichen *Himantormia lugubris*, as deduced from the analysis of metabolite accumulation
by J.L. Mateos, E. Conde, T. Miranda and C. Vicente (Madrid, Spain) ..... 1—9

Machaerocereus eruca cactus isolectins. Purification and characterization
by E. Zenteno, J.L. Ochoa, L.F. Montaño, H. Debray and J. Montreuil (Mexico City, Mexico and Villeneuve dAscq, France)..... 11—19

Purification and characterization of wall-bound β-1,3-glucanases in cultured carrot cells
by F. Kurosaki, Y. Tokitoh and A. Nishi (Sugitani, Japan)..... 21—28

Cytokinins modulate the steady-state levels of light-dependent and light-independent proteins and mRNAs in tobacco cell suspensions
by M.O. Abdelghani, L. Suty, J.N. Chen, J.-P. Renaudin and B. Teyssendier de la Serve (Dijon, France) 29—40

Silica-bound *N*-acetylglucosaminyl residues elicit laminarinase activity in *Rubus* protoplasts
by Y. Lienart, C. Gautier and H. Driguez (Grenoble, France)..... 41—45

Glucosidases (α, β) and trehalase (α) in the peribacteroid space and the bacteroid periplasm of *Glycine max* root nodules
by A. Kinnback and D. Werner (Marburg/Lahn, Germany)..... 47—55

Characterization of seven monoclonal antibodies directed against *Nicotiana plumbaginifolia* ribulose 1,5-bisphosphate carboxylase/oxygenase
by C. Meyer, J. Grosclaude and P. Rouzé (Versailles and Jouy en Josas, France)..... 57—66

An uncommon multiphosphorylated lipid in *Neurospora crassa* whose formation is catalyzed in vitro by a calcium- and phospholipid-dependent kinase
by B. Favre, G. Mauco, G. Turian and H. Chap (Geneva, Switzerland and Toulouse, France)..... 67—80

GENETICS AND MOLECULAR BIOLOGY

Evolutionary studies of the chloroplast genome in *Pteridium*
by M.K. Tan (Sydney, Australia)..... 81—91

Molecular characterization of four *shrunken* mutations induced in *Mutator* lines in *Zea mays* L.
by J.M. Anderson, D.S. Robertson and D.W. Morris (Ames, IO)..... 93—101

CELL AND TISSUE STUSIES IN VITRO

Inhibitory effects of volatile compounds released from rice callus on soybean callus growth: allelopathic evidence observed using in vitro cultures
by Y.-S. Yang and Y. Futsuhara (Chikusaku, Japan)..... 103—110

High frequency somatic embryogenesis from leaf tissue of *Populus* spp.
by C.H. Michler and E.O. Bauer (Rhinelander, WI)..... 111—118

Induction of desiccation tolerance in microspore-derived embryos of *Brassica napus* L. by thermal stress
by K. Anandarajah, L. Kott, W.D. Beversdorf and B.D. McKersie (Guelph, Canada)..... 119—123

Acid citrus somatic hybrids between sudachi (*Citrus sudachi* Hort. ex Shirai) and lime (*C. aurantifolia* Swing.) produced by electrofusion
by W. Saito, T. Ohgawara, J. Shimizu and S. Ishii (Noda, Japan)..... 125—130

GENERAL

Effect of difluoromethylornithine on growth, cell size and germination of *Ceratocystis ulmi* spores
by J.I. García, G. Nicolás and T. Valle (Salamanca, Spain)..... 131—136

Book Reviews ..... 137—138

PHYSIOLOGY AND BIOCHEMISTRY

Distribution of cadmium and induced Cd-binding proteins in roots, stems and leaves of *Phaseolus vulgaris*
by L. Leita, M. Contin and A. Maggioni (Udine, Italy) 139–147

The content of *N*-malonyl-D-tryptophan in seeds and seedlings of plants
by K.Z. Gamburg, O.V. Glusdo and N.I. Rekoslavskaya (Irkutsk, U.S.S.R.) 149–153

Fate of petasol, a phytotoxin produced by *Drechslera gigantea*, in planta
by G.J. Bunkers and G.A. Strobel (Bozeman, MT) 155–161

Effect of iron deficiency on electron transport processes of plasmalemma-enriched vesicles isolated from cotton roots
by E. Chosack, B. Rubinstein and L. Reinhold (Jerusalem, Israel and Amherst, MA) 163–172

Effect of light on the activity of the protein synthesising system in wheat seedling
by D. Lasztiy, I. Rácz, I. Király, E. Jakucs and E. Páldi (Budapest and Martonvásár, Hungary)..... 173–176

Contrasting roles for pyrophosphate:fructose-6-phosphate phosphotransferase during aging of tissue slices from potato tubers and carrot storage tissues
by M. Hajirezaei and M. Stitt (Bayreuth, F.R.G.) 177–183

Development of α-galactosidase isoenzymes in chickpea seeds
by Y. Mittal and C.B. Sharma (Roorkee, India) 185–190

Profiles of enzymes of sucrose metabolism in the leaves of chicory (*Cichorium intybus*) during development
by A.K. Gupta, P. Mann, N. Kaur and R. Singh (Ludhiana, India) 191–196

Enzymatic hydrolysis of physodic acid in *Pseudevernia furfuracea*. Characterization of the product of depsidone hydrolysis
by E. Garcia-Junceda, M.C. Cambon and C. Vicente (Madrid, Spain) 197–206

Cytokinin levels during the germination and seedling growth of *Cicer arietinum* L.: effect of exogenous application of calcium and cytokinins
by P. Gallego, J. Hernandez-Nistal, L. Martin, G. Nicolas and N. Villalobos (Salamanca, Spain) ... 207–221

Gibberellic acid stimulates lipid metabolism in barley aleurone protoplasts
by M.-E. Arnalte, M.-J. Cornejo, D.S. Bush and R.L. Jones (Valencia, Spain and Berkeley, CA) ... 223–232

CELL AND TISSUE STUDIES IN VITRO

Effects of gelling agents, ammonium nitrate, and light on the development of *Picea mariana* (Mill) B.S.P. (black spruce) and *Picea rubens* Sarg. (red spruce) somatic embryos
by L. Tremblay and F.M. Tremblay (Chalk River, Canada) 233–242

Competence of cereal leaf cells. I. Patterns of proliferation and regeneration capability in vitro of the inflorescence sheath leaves of barley, wheat and tritordeum
by P. Barcelo, P.A. Lazzeri, A. Martin and H. Lörz (Hamburg, Germany and Cordoba, Spain) 243–251

Callus formation from isolated globe artichoke (*Cynara scolymus* L.) suspension protoplasts
by R.J. Ordas, R. Tavazza and G. Ancora (Oviedo, Spain and Rome, Italy) 253–259

GENERAL

Phytoalexin production and cell death in elicited carrot cell suspension cultures
by F. Marinelli, S. Di Gregorio and V. Nuti Ronchi (Pisa, Italy) 261–266

Subject Index Volume 77 267–269
Author Index Volume 77 271
